

Waihoehoe Road upgrade

The Waihoehoe Road upgrade is on 400 metres of Waihoehoe Road between Great South Road and Kath Henry Lane.

KEY

- Proposed bus stops
- Proposed raised median barrier
- Proposed retaining wall
- Proposed separated cycleway
- Proposed footpath
- Proposed berm
- Proposed new signalised intersection
-) Proposed new bridge

We heard you'd like no impact on Drury Domain.
We're planning for the project to not impact the Domain.

We heard you support continued access in and out of Tui St.
We're planning changes to Tui St access to address safety and accommodate increased traffic volumes, while ensuring you can still access Tui St.

We heard you'd like to see the library, hall, and other important community amenities along Tui St retained or relocated nearby.
We're planning to retain community amenities along Tui St.

We heard you want no impact on the Drury Village businesses, or the businesses to be relocated nearby. The 232 Great South Rd property is required for a new Waihoehoe bridge to enable electrification and future four-tracking of the rail line, and to support Drury's growing population. **We're progressing** discussions with the business tenants at 232 Great South Road, including looking at options to enable businesses to remain in the local area.

We heard you want the well at 232 Great South Road to be protected.
We're planning to review the heritage status of the well and to work with Auckland Council and the community to investigate options to determine the future of the well.

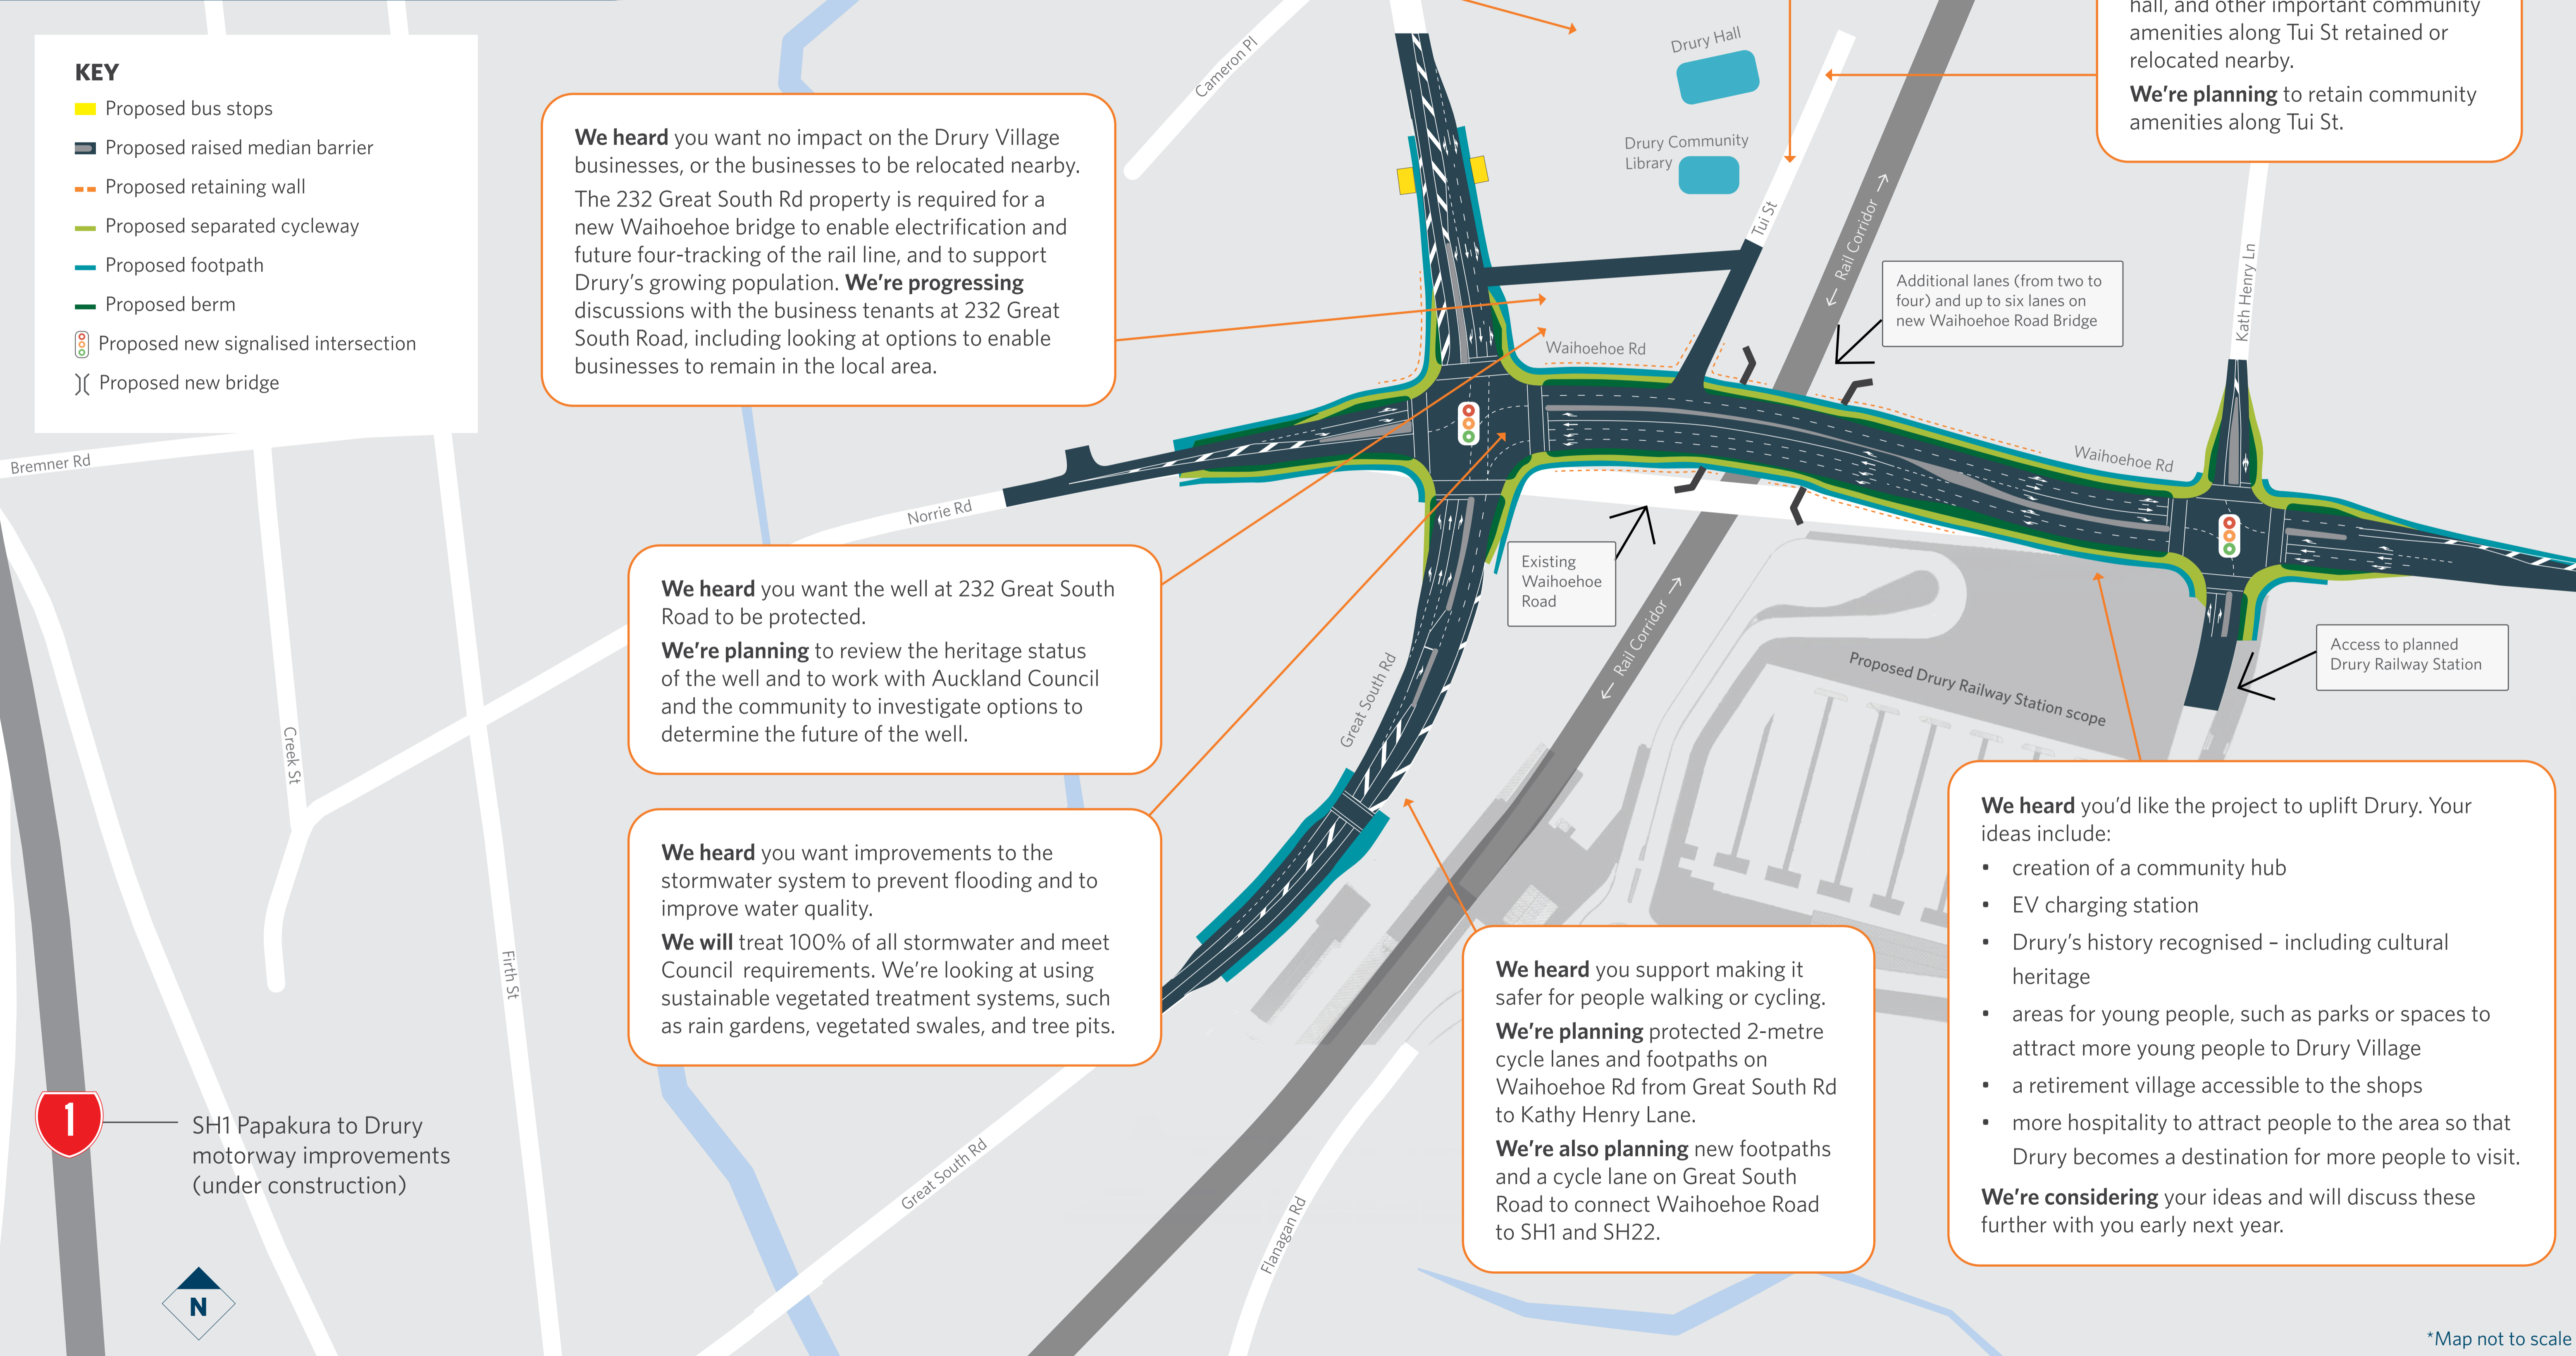

We heard you want improvements to the stormwater system to prevent flooding and to improve water quality.
We will treat 100% of all stormwater and meet Council requirements. We're looking at using sustainable vegetated treatment systems, such as rain gardens, vegetated swales, and tree pits.

We heard you support making it safer for people walking or cycling.
We're planning protected 2-metre cycle lanes and footpaths on Waihoehoe Rd from Great South Rd to Kathy Henry Lane.
We're also planning new footpaths and a cycle lane on Great South Road to connect Waihoehoe Road to SH1 and SH22.

We heard you'd like the project to uplift Drury. Your ideas include:

- creation of a community hub
- EV charging station
- Drury's history recognised - including cultural heritage
- areas for young people, such as parks or spaces to attract more young people to Drury Village
- a retirement village accessible to the shops
- more hospitality to attract people to the area so that Drury becomes a destination for more people to visit.

We're considering your ideas and will discuss these further with you early next year.
