

# THE WESTERN BELFAST BYPASS

Canterbury's newest stretch of highway, the Western Belfast Bypass, opens to traffic in stages from Tuesday October 31.

Stay focussed and make sure you take the correct turn-off to get to your destination.

The staged opening will allow the project team to complete the final parts of the project.

Weather dependent, we expect all lanes to be open to traffic in December 2017. The team will be back to lay the final low noise asphalt surfacing in spring 2018.
