

WHANGAREI IMPROVEMENTS SELWYN AVENUE TO WILSON AVENUE

Intersection improvements between Selwyn Avenue and Wilson Avenue included widening the state highway to four lanes to improve traffic flows and reduce congestion at peak times.

Traffic signals at Central Avenue have been reconfigured and a free left turn lane installed at the intersections to provide efficient access to/from the city centre.

The upgrade to Selwyn Avenue started on Monday 24 March with the new signals being installed.

There will be a change to the intersection layout and a temporary closure of Selwyn West starting Saturday 3 May to allow the intersection to be upgrade.

The upgrade is due to be completed in September 2014.

PROJECT OVERVIEW

- SH1 has been widened to four lanes between Selwyn Avenue and Central Avenue
- A free left turn has been constructed at Central Avenue East for southbound traffic existing onto the state highway
- A free left turn has been constructed from the state highway into Central East for southbound traffic
- A free left turn from the state highway will be constructed for southbound vehicles exiting the state highway into Selwyn Avenue East.
- A free left turn from Selwyn Avenue east will be constructed for southbound traffic exiting onto the state highway
- Traffic signals have been upgraded at Central Avenue
