Contingency plan						1					

RCA consent (eg CAR/WAP) and/or RCA contract reference

If long queues form or delays exceed 5mins (or any other period required by RCA), site to be disestablished or additional lanes made available.

Adjust TMD to suit unforeseen circumstances (eg weather or site overlaps with another work site).

Emergency services will be accommodated and access provided through the site as required.

Add additional contingencies:

In the event of a spillage the vehicle will be placed between the spill and the oncoming traffic. The vehicle is to placed as far to the left as possible. The spillage will be swept to the left side and the lane reopened as soon as practical.

In the event of an hydraulic failure the vehicle will be moved to the left and parked as far as practical away from the traffic to await repair or salvage.

Qualifier for engineer or TMC approval

Approval of this TMP authorises the use of any regulatory signs included in the TMP or attached traffic management diagrams.

This TMP is approved on the following basis:

- 1. To the best of the approving engineer's/TMC's judgment this TMP conforms to the requirements of CoPTTM.
- 2. This plan is approved on the basis that the activity, the location and the road environment have been correctly represented by the applicant. Any inaccuracy in the portrayal of this information is the responsibility of the applicant.
- 3. The STMS for the activity is reminded that it is the STMS's duty to postpone, cancel or modify operations due to the adverse traffic, weather or other conditions that affect the safety of this site.
