Information for year ended Dec 2007

## Purpose of this publication

Land Transport New Zealand annually publishes comparative information on the safety of New Zealand roads. The information in this publication has been collected through the Crash Analysis System (CAS) which is an integrated system providing tools to analyse crash data and related data. It has a mapping capability integrated with a querying and reporting capability.

The information held within CAS includes precise location, which allows the importance of location to be determined (for example, in "black-spot" analysis) and also allows a comparison between local authorities.

This publication is available on the Land Transport NZ website, under *Performance of Land Transport* (<http://www.landtransport.govt.nz/performance/index.html>)

## Data/Graphs

Because of the volume of information data and graphs have been published in separate documents, both available from the same website.

## Enquiries and Feedback

We are keen to receive your feedback and happy to deal with any enquiries regarding the data.

In the first instance we recommend that you contact the manager of performance information at your local Land Transport NZ office:

Northern Region Chris Hewitt 09 969 9801

Midland Region Andrew McKillop 07 958 7856
