

New vehicle importation process

Applicable for NZTA approved entry certifiers only. Parallel imports use the used vehicle importation process.

Enter your Clean Car Standard (CCS) account numbers into MIAMI

Load your VinDirect VIN notification file into MIAMI

- MIAMI will combine this with your CCS account number for each 'Make'.

MIAMI sends the VINs to the Motor Vehicle Register (MVR)

- This will create the vehicle records in MVR as complied, and will include the CCS account number.

Register vehicle at any time

- Once the MVR vehicle record is created, it can be registered at any time.

MVR automatically sends the vehicle records to the CCS System

- These create vehicle records in the CCS account supplied.

Pre-Delivery Inspection (PDI) is complete

- When the dealer is ready, they will update the vehicle record in MVR recording that the Pre-Delivery Inspection (PDI) has been completed.

Vehicle accepted in the CCS system

- Once the PDI is complete, the vehicle in CCS has a pending status and can be accepted (and charges paid if on Pay As You Go).

WoF/CoF vehicle

- The WoF/CoF can be completed on the vehicle and updated in the MVR.
